

PIMA COUNTY SHERIFF'S DEPARTMENT

# COLD CASE INFORMATION

**CASE #121218143**

## **Victim: Frederick Dale Huddleston**

On December 18th, 2012, A road crew located a shallow grave that contained the skeletal remains of an adult male off the eastbound frontage road in the area of I10 and Craycroft Rd. The victim's body was exhumed, and an autopsy was performed that indicated the subject's death was a homicide. At that time the victim was not known, and his identity remained a mystery, until July of 2024. A sample that had been collected at the autopsy had been processed for a DNA profile that was subsequently submitted to a Genetic Genealogy study that resulted in positively identifying the victim as Frederick Dale Huddleston.

Researching Mr. Huddleston, the Pima County Sheriff's Department found that the last known contact with him was in December of 2008, in the area where his body had been located. Mr. Huddleston was known to drift from state to state and has involvements in Florida, Texas, Colorado and Indiana.
